

### Rebalancing of Index Securities

The annual rebalancing of the Bloomberg Commodity Index and Bloomberg Commodity Index 3 Month Forward will commence next week. Consequently, each of the twenty-eight categories of Index Securities (comprising eighteen categories of Classic Index Securities and ten categories of Longer Dated Index Securities) as set out in the Prospectus of WisdomTree Commodity Securities Limited (the "Issuer") dated 27 October 2023 will also be rebalanced. As explained in the Prospectus, this will be done by adjusting the number of Micro Securities comprised in each Index Security.

The rebalancing itself will not change the value of any Index Security and no action is required on the part of Security Holders. The rebalancing does not affect the fifty-two classes of Individual Securities (comprising twenty-nine classes of Classic Individual Securities and twenty-three classes of Longer Dated Individual Securities).

The timetable for the rebalancing of the Index Securities is as follows:

#### Friday 5 January 2024

The target number of Micro Securities to be increased/decreased for each commodity in each Index Security will be determined using 5 January 2024's settlement prices.

#### Tuesday 9 January 2024, Wednesday 10 January 2024, Thursday 11 January 2024, Friday 12 January 2024, Monday 15 January 2024

At the beginning of each of these days, the number of Micro Securities will be adjusted, based on the targeted changes and the actual previous day's closing prices, and the updated number of Micro Securities for each class of Index Security in issue will be available prior to trading commencing on the Issuer's website at:

<https://www.wisdomtree.eu/en-gb/pricing/wisdomtree-commodity-securities-limited-classic>

and

<https://www.wisdomtree.eu/en-gb/pricing/wisdomtree-commodity-securities-limited-longer-dated>

#### Final Rebalance Date

The final number of Micro Securities in each Index Security following the rebalancing will be announced prior to the opening of trading. (Note, however, if there is a Market Disruption Event for a commodity then the rebalance period in respect of the Micro Securities for any Index Security containing that commodity will be extended by way of Extended Voluntary Rebalancing).

The table below shows (i) the existing weighting of each commodity for the Classic Securities and the Longer Dated Securities, as measured by the effective weight at current commodity prices in the WisdomTree Broad Commodities Index Security (for the Classic Securities) or the WisdomTree Broad Commodities Longer Dated Index Security (for the Longer Dated Securities), and (ii) the targeted new weighting of each commodity for the Classic Securities and the Longer Dated Securities, based on the Commodity Index Percentage to be used in the rebalancing of Bloomberg Commodity Index (Classic Securities) or Bloomberg Commodity Index 3 Month Forward (Longer Dated Securities).

	Existing weights based on current commodity prices (Classic securities)*	Existing weights based on current commodity prices (Longer Dated securities)*	Targeted weights based on new CIPs for the BCOM (Classic securities)	Targeted weights based on new CIPs for the BCOMF3 (Longer Dated securities)
Natural Gas	4.02%	4.86%	7.98%	7.98%
