* Past performance is not indicative of future returns. Total Return NAV is calculated based on re-investing dividend at the net asset value on the ex-dividend date. The ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to be paid the most recently declared dividend. It is also on this date that an amount roughly equal to the dividend paid is removed from the Fund's net asset value once declared.
 ** The Trailing 12-Month Distribution Yield represents the yield over the prior twelve months if the investor had purchased the Fund and held it for a year, assuming no change in NAV. It may not be an accurate reflection of the actual return an investor may have received because the Fund's NAV is constantly changing due to market factors. This represents the net distribution yield.
 *** 12 months of distribution data is not available

Benchmark indices are Net Total Return indices, which assume the reinvestment of net dividends and exclude management fees, transaction costs and expenses. You cannot invest directly in an index.
