

COMMUNICATION REGARDING PROSPECTUS UPDATE

As you will recall, at the Annual General Meeting (“AGM”) of Wisdomtree Issuer Plc (the “Fund”) on 20 May 2016 the shareholders approved a number of resolutions, including amending the Memorandum and Articles of Association of the Fund to reflect changes to the Irish companies Act and the Irish Central Bank UCITS Regulations.

These changes became effective on **1 July 2016**. We want to draw your attention to one update below which is not yet reflected in the Fund’s prospectus.

The Central Bank of Ireland is currently reviewing the Fund’s prospectus and this change will be reflected in the updated prospectus.

This update is to ensure the Fund is in compliance with the UCITS Regulations. **This is a standard term across all UCITS funds and is NOT specific to WisdomTree Funds.**

Article 21(e) of the Memorandum and Articles of Association of the Fund has been updated to reflect the requirements of Regulation 33(3) of the Central Bank UCITS Regulations. Where a gate is applied to redemptions on a dealing day, currently those redemption requests will take priority over any subsequently received redemption request on the next dealing day. Regulation 33(3) of the Central Bank UCITS Regulations requires that any part of an initial redemption request held over must be dealt with in conjunction with any subsequently received redemptions rather than in priority to them.
